Allowable Subject Matter

Claims 1 – 21 are allowed. The following is a statement of reasons for such an indication.

The prior art of record fail to suggest a method for coordinating torque demand amongst a plurality of torque producing devices in an automotive vehicle, comprising, among other limitations, based upon comparison results,

(a) determining a first excess requested torque as a difference between the request for torque and exceeded first torque producing device torque production limitation,

(b) determining as first coordinated torque request the exceeded limitation,

(c) determining as the second coordinated torque request the first excess requested torque; sending the first coordinated torque request to the first torque producing device; and

(d) sending the second coordinated torque request to at least one second torque producing device.

The automotive vehicle including, among others, a control logic operative to determine as a first coordinated torque request a sum of the initial coordinated torque request and the second excess requested torque.
